As a patent attorney, Hema counsels clients on IP strategy. She has successfully prosecuted more than 400 U.S. patents across a wide range of technologies, including software applications, video technology, augmented and virtual reality, artificial intelligence, data science, data security and privacy, drones, autonomous vehicle technology, semiconductor design, blockchain, computer networking, wireless systems, and storage systems.

She develops comprehensive, business-aligned IP strategies—including global portfolio development and licensing strategies—for individuals, growth-stage companies, and multinational corporations, including Fortune 100 technology firms. Hema also has experience in preparing patentability and infringement opinions, manages foreign associates on worldwide filings, and represents clients before the Trademark Trial and Appeal Board.
